TITLE 3—THE PRESIDENT PROCLAMATION 2731

FLAG DAY, 1947

BY THE PRESIDENT OF THE UNITED STATES
OF AMERICA
A PROCLAMATION

WHEREAS it has become our hallowed custom to observe June 14 of each year as Flag Day by engaging in patriotic exercises and by displaying the American flag proudly in commemoration of its adoption on June 14 in the year 1777; and

WHEREAS this symbol of our national strength, our national unity, and our national integrity now flies with the flags of all the other United Nations as an earnest of newly achieved international strength, unity, and integrity; and

WHEREAS, in the words of President Wilson set forth in his Flag Day proclamation of 1916, the anniversary of the adoption of the Stars and Stripes as our national emblem "should this year and in the years to come be given special significance as a day of renewal and reminder, a day upon which we should direct our minds . . . to thoughts of the ideals and principles of which we have sought to make our great Government the embodiment";

NOW, THEREFORE, I, HARRY S. TRUMAN, President of the United States of America, do hereby designate June 14, 1947, as Flag Day; and I direct the officials of the Federal Government and request the officials of the State and local governments to have our colors displayed on all public buildings on that day.

I also urge the people of the United States to fly the American flag from their homes on June 14, and I suggest that civic groups and individuals arrange, where feasible, for joint displays of the emblems of the United Nations in recognition of our joint dedication to the freedom of mankind.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the seal of the United States of America to be affixed.

DONE at the City of Washington this 27th day of May in the year of our Lord nineteen hundred and forty-seven, and of the Independence

PART 110—PRIMARY INSPECTION AND DETENTION

DESIGNATION OF BOUNDARY, ALASKA, AS CLASS A PORT OF ENTRY

MAY 9, 1947.

Section 110.1 *Ports of entry for aliens*, Chapter I, Title 8, Code of Federal Regulations is amended by inserting "Boundary, Alaska" before "Eagle, Alaska" in the list of Class A ports of entry in District No. 12.

This order shall become effective on the date of its publication in the FEDERAL REGISTER. The publication of notice, the public procedure, and the delayed effective date prescribed by section 4 of the Administrative Procedure Act (Pub. Law 404, 79th Cong.; 60 Stat. 238) are found unnecessary and contrary to the public interest for the reasons that (1) interested persons have recently made representations as to the need for a port of entry at Boundary, Alaska; (2) customs facilities have already been established at Boundary, Alaska; and (3) it is found that commerce between Canada and the United States would be hindered by a delay in the opening of that port.

The present regulations provide that the application for an allotment by an industrial user must be made on or after

* 11 F. R. 177, 14281.

the 10th day of the month preceding the beginning of the allotment period but not more than 5 days after the beginning of the allotment period and impose a general limitation on the acquisition of sugar by an industrial user when he has on hand an amount of sugar equal to or more than one-third of his allotment.

This amendment advances the application date from the 10th to the first day of the month preceding the beginning of the allotment period and removes the general limitation on the acquisition of sugar by industrial users.

Advancing the regular application date will result in earlier issuance of allotments to industrial users, thus permitting them to buy sugar in advance of the customary time. Due to the continued depletion of box-car facilities and in anticipation that this year's expected record grain crop will add to the transportation problems just at the time when the heaviest sugar movement generally occurs, it is considered desirable to encourage industrial users to draw upon the existing stocks of their sugar suppliers earlier than would otherwise be possible. Increasing the flow of sugar from warehouses into industrial users' inventories will also release needed warehousing facilities for the incoming sugar crop.

The general limitation on the acquisition of sugar by industrial users is re-

moved in order to enable them to purchase their entire allotment as soon as it is granted.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 21—INTERNATIONAL POSTAL SERVICE SERVICE TO CERTAIN FOREIGN COUNTRIES

In Subpart B of Part 21 (39 CFR) make the following changes:

1. The regulations under the country "Union of Soviet Socialist Republics" are amended to read as follows:

UNION OF SOVIET SOCIALIST REPUBLICS

Regular mails. See Table No. 1, § 21.116 (39 CFR, Part 21) for classifications, rates, weight limits and dimensions: Small packets not accepted.

Indemnity. Not exceeding \$16.33 for Postal Union Registered articles.

Special delivery. No service.

Money-order service. No provision.

Air mail service. Postage rate, 15 cents one-half ounce.

Observations. The postal administration of the Union of Soviet Socialist Republics has advised that a large number of newspapers from abroad arrive in that country without address, due to the fact that the wrappers are generally made of paper not strong enough to withstand the long voyage and repeated handlings, and must therefore be sent to the dead letter office by that service; and has requested that publishers use only very strong paper for making address wrappers and that the address be reproduced on the article itself, in order to insure its delivery in case the wrapper is torn off en route.

The following regulations govern the admission of "prints" containing literary publications and fashion journals addressed to private individuals:

Fashion journals sent singly to state enterprises engaged in garment making or the sale of clothing, or to private individuals, are admitted without hindrance: *Provided*, That the regulations in force relative to printed matter are observed.

Printed articles containing fashion journals addressed to private persons are to be delivered to the addressees only if the respective licenses are presented, regardless of the sender (private person or firm). If such licenses are not submitted, the articles in question will be returned to origin.

Articles of printed matter and any other articles containing periodical or nonperiodical literature, sent by bookstores or other firms to individuals are admitted without a license only if they contain a single copy of each publication (book, magazine, or newspaper).

Packages containing seeds, plants, and parts of plants intended for propagation are subject, after their arrival in the Union of Soviet Socialist Republics, to an examination by the Quarantine Inspection Service which shall decide whether or not such shipments are admissible. Shipments which do not conform to the regulations will either be returned to the country of origin or destroyed.

Prohibitions. Dutiable articles (merchandise) in letters and packages prepaid at letter rate.

Values payable to the bearer, coins, manufactured or unmanufactured platinum, gold or silver, precious stones, jewelry and other precious articles.

The importation by mail in the Union of Soviet Socialist Republics of State bank notes of the country named, of Treasury notes and specie of that country, is prohibited.

It is also forbidden to import means of payment (drafts, etc.) made up in money of the Union of Soviet Socialist Republics, with the exception of checks and other remittances made up in money of the Union of Soviet Socialist Republics to the open accounts current in the credit establishments of the Union of Soviet Socialist Republics expressly for accounts relative to foreign commerce; checks and other remittances to the accounts of foreign correspondents in the credit establishments of the Union of Soviet Socialist Republics ("Loro" accounts), as well as travelers' checks of the State Bank of the Union of Soviet Socialist Republics.

The importation by mail of foreign obligations of public loans, as well as of stocks and obligations of foreign State establishments and enterprises, public and private; and of coupons, is admitted if a permit is presented from the Values Section of the People's Commissariat for Finance of the Union of Soviet Socialist Republics at Moscow.

The prohibition against importing Soviet State bank notes and Soviet treasury notes and specie, as well as means of payment (drafts, etc.) in Soviet money, does not extend to those which were exported from the Union of Soviet Socialist Republics up until August 1, 1926.

Anyone desiring to send such values by mail is bound to present in advance to the administration of values of the People's Commissariat for Finance of the Union of Soviet Socialist Republics the respective proofs as to the date of exportation of the said values, and must obtain the opinion of the said administration that the proofs are sufficient.

The importation by mail of sight drafts drawn in money of the Union of Soviet Socialist Republics and exported with the permission of the Values Section of the People's Commissariat for Values is admitted without restriction as to the amounts, and independently of the date of their exportation abroad.

Void paper values, obligations issued by private persons, companies, and cities.

Mail articles of all kinds destined for the Union of Soviet Socialist Republics, in which the inclusion of various values and securities has been effected without observing the above conditions, will be confiscated.

The importation from foreign countries of bank notes of the former Polish Bank, as well as bills of the state treasury and coins of the former Government of Poland, is prohibited.

Documents, prints, engravings, photographs, films, manuscripts, drawings, and designs, which may injure the Union of Soviet Socialist Republics politically or economically,

Prints, engravings, photographs, films, manuscripts, drawings, designs, photographs, printing plates, phonograph records, and materials for their manufacture, may be admitted, provided they have been previously authorized by the Soviet Government.

On imported prints it is also temporarily prohibited to correct mistake in printing, or to bring out, by means of point or dashes, traced by hand or machinery, and isolated words or sentences.

Postage stamps, cancelled or not, philatelic collections, bonds, and bills of exchange, no longer valid, when sent by mail to private individuals.

Articles containing match-box labels for collectors may be imported without special license only when they contain but a single specimen of each kind. If more than one specimen of a kind is inclosed, a special permit must be obtained from the People's Commissariat for Foreign Commerce.

The articles prohibited importation are also prohibited transmission through the country.

Also all articles prohibited in the form of parcel post.

Parcel post. (Union of Soviet Socialist Republics.)

Parcels containing seeds, plants, and parts of plants destined for planting are subject on arrival in the U. S. S. R. to expert inspection by the Quarantine Inspection Service, which decides whether or not they will be admitted. Accordingly, the seeds, plants, and parts of plants in question may be returned to origin, or even destroyed if necessary.

The Safety Bureau of the Civil Aeronautics Board is presenting proposed amendments to Parts 41 and 61 of the Civil Air Regulations specifying the minimum recent experience a flight engineer

is required to have before he may serve in air carrier operation.

The proposed amendments have not been considered by the Board and are being published to provide an opportunity for those interested to submit any comments, suggestions, or changes which they believe desirable. The Safety Bureau will give careful consideration to all replies received and, after making any changes which appear to be appropriate, will present the proposed amendments to the Board for adoption. Any substantial

objections to this proposal will be brought to the attention of the Board.

These amendments, in addition to supplying the requirements specified by ICAO, furnish a means to insure continued competency, and provide the requirements for checkout in a new make or model of aircraft.

The proposed amendments are as follows:

(b) Familiarized himself with all current information and operating procedures relating to the make and model aircraft to which he is to be assigned and has demonstrated his competency on

such aircraft to an authorized representative of the Administrator.

These regulations are proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended.

It is the desire of the Bureau that those interested offer suggestions and comments regarding the proposed amendments. Comments in writing should be addressed to the Safety Bureau, Civil

[Project No. 1888]

METROPOLITAN EDISON CO.

ORDER ENLARGING ISSUES

Upon consideration of an application filed December 6, 1944, by Metropolitan Edison Company for a rehearing on the Commission's order of November 7, 1944 authorizing the issuance of a license for a constructed power project on the Susquehanna River near York Haven, Pennsylvania, Project No. 1888;

It appearing that:

(a) Among other items applicant objected to the requirement prescribed in paragraph (B) of said order that amortization reserves created pursuant to section 10 (d) of the Federal Power Act

should be set aside from earnings "received in any calendar year," whereas applicant says that such reserves should be set aside only from "accumulated" earnings or earnings averaged over a reasonable period;

(b) The amortization reserve is only one of several reserves which are to be deducted from the actual legitimate original cost of a licensed project when the net investment is determined under section 3 (13) of the act and such deductions from cost are to be made if and to the extent that they have been accumulated during the period of the license from earnings in excess of a fair return on the investment in the property;

(c) Consideration should be given to the inclusion of the following special condition in the license for Project No. 1888:

During the entire period of the license, all project earnings in excess of a fair return upon the net investment in said project and which have not been appropriated to amortization, sinking fund, or similar reserves, shall be appropriated annually to a special reserve under Account 258.1, Amortization Reserve—Federal, the credit balance in such special reserve to be applied annually as a deduction from actual legitimate original cost in determining net investment in accordance with section 3 (13) of the act.

The Commission finds that:

The rehearing upon the license for Project No. 1888 should be reopened for the presentation of evidence and arguments with respect to the inclusion in the license of the special condition set forth in paragraph (c) above.

Upon its own motion the Commission orders that:

A public hearing on inclusion of the special condition set forth in paragraph (c) above be held in the Commission's Hearing Room on the 12th Floor of the Hurley-Wright Building, 1800 Pennsylvania Avenue NW., Washington, D. C., beginning at 10 o'clock a. m. (e. d. s. t.) on July 28, 1947.

Date of issuance: May 28, 1947.

By the Commission.

[Docket No. IT-6056]

SOUTHWESTERN POWER ADMINISTRATION

NOTICE OF REQUEST FOR APPROVAL OF RATES
AND CHARGES FOR SALE OF POWER

MAY 26, 1947.

Notice is hereby given that pursuant to the provisions of the Flood Control Act of 1944 (58 Stat. 830) the Administrator of the Southwestern Power Administration filed with the Federal Power Commission, for approval, certain rates and charges for the sale of electric energy generated at the Denison Dam Project on the Red River between the States of Oklahoma and Texas, as set forth in a proposed agreement between Southwestern Power Administration, an agency of the Department of Interior, and Texas Power & Light Company.

The proposed agreement contains in its preamble the following paragraphs, among others:

Whereas, there is now allocated at the Denison Dam Project reservoir storage between elevation 590 feet and 617 feet for power production, and

Whereas, competent engineering studies, based upon the best available records of river flow, indicate that with one generating unit and the utilization of the reservoir capacity now allocated to power there can be produced at the Denison Dam Project 140,000,000 kwh of primary and an average of 78,000,000 kwh of secondary energy per year, with a second generating unit installed there can be produced the same amount of primary and an average of 127,000,000 kwh of secondary energy per year and with a third generating unit installed there can be produced the same amount of primary and an average of 156,000,000 kwh of secondary energy per year, and

Whereas, present estimates of primary and secondary energy that can be produced by the Denison Dam Project will probably be increased through the effects of integrated operation, and

Whereas, the amounts of the primary and secondary energy that can be produced by the Denison Dam Project might be changed by (a) a revision in the operating policy of the War Department, (b) the possible future construction of additional reservoir storage on the Red River above the Denison reservoir or (c) other factors entering into their destination. * * *

The agreement provides that the Government shall furnish the following services, among others, to the Company:

(a) Until the completion of the second generating unit at the Denison Dam, the continuation of the present delivery of 120,000,000 kwh primary energy per year taken at a rate not to exceed the capacity of the unit minus 5,000 kw plus such sec-

ondary energy as the Government elects to deliver to the Company.

(b) After the completion of the second generating unit, the delivery of 70,000,000 kwh of primary energy per year taken at a rate not to exceed the capacity of one unit plus half the secondary energy of the project, provided that when the reservoir level is below the top of the power storage allocation, the Company may schedule its receipt of secondary energy but it shall assume the responsibility for any loss by the Company of secondary energy by reason of the discharge of the water representing such stored energy in order to meet the requirements of flood control.

(c) After the completion of the third generating unit, the Government shall make half the capacity of such unit available to the Company except when such unit is required as reserve capacity for the other two units; in addition, the Government shall make the other half available except when needed for service to the Government's other customers, all of which is in addition to the capacity and energy covered by item (b), above.

The proposed agreement further provides that the Government shall have the right to take out of the Company's system, at any points designated by the Government, power and energy in wholesale quantities to serve its own customers, as authorized under section 5 of the Flood Control Act of 1944, subject to the following conditions:

(a) The parties agree that the right of the Government created by the contract to take power and energy out of the Company's system is primarily for the purpose of serving public bodies and co-operatives which have preference as to service under the Flood Control Act of 1944. The Government agrees that it will not dispose of any such power and energy to any customer outside such preferred class until after the expiration of 18 months from the date on which service begins. Should the Government thereafter dispose of such power and energy to a customer outside the preferred class, the Company may at its election terminate the agreement by three years' written notice.

(b) The maximum demand of the Government shall not exceed 20,000 kw until the third generating unit at the Denison Dam is installed and ready for commercial operation and 25,000 kw thereafter.

(c) The Government shall give the Company 30 days' written notice of its intention to take out of the Company's system power and energy and of the date on which such withdrawal shall begin.

(d) The Company shall not be required to deliver power and energy to the Government requiring the installation of new facilities until the Company shall have had reasonable time in which to install such facilities.

(e) The Company shall not be required to deliver power and energy to the Government or its customers for service in any town or municipality in which the Company is now serving or may hereafter serve customers at retail: *Provided*, That the Company may be required to deliver power and energy from the Com-

pany's 138-KV bus at its Payne Substation for delivery by the Government over the Government's own lines to such towns or municipalities now owning and operating their own electric distribution systems, subject to the provisions in the next paragraph.

(f) If the Government serves customers now or hereafter supplied by the Company excluding establishments operated by or for the account of the Government or rural electric cooperatives incorporated under the Texas Electric Cooperative Corporation Act and serving only customers authorized to be served under said act, the Government shall deduct from the Company's monthly payment a credit equal to the difference between the cost of such power and energy computed at the lowest then effective rate of the Government and the cost of such power and energy computed at the lowest then effective rate of the Company applicable to the service to such customers.

(g) The Company shall not be required to deliver power and energy to the Government or its customers for delivery to any customer of any other privately owned utility company having electric facilities directly interconnected with the transmission lines of the Company and purchasing power and energy from, or interchanging the same with, the Company.

The agreement further provides that the Government shall not at any time enter into contracts with customers or render service to its customers to an extent which will result in the maximum demand of the Government exceeding 20,000 kw until the third generating unit is ready for commercial operation, and 25,000 kw thereafter. The Company shall not be obligated to extend its facilities to or establish service to any additional customers or at any additional delivery points if this would result in the maximum demand of the Government exceeding the number of kilowatts specified above. In the event the maximum demand of the Government during any month shall exceed the specified number of kilowatts, the Company shall promptly notify the Government, and the Government shall within 30 days after receipt of such notice direct the Company to discontinue service to specified customers to the extent necessary to reduce the maximum demand of the Government to its specified number of kilowatts. In the event the Government does not so direct the Company within such period, the Company shall have the right to disconnect the necessary number of customers of the Government, and shall disconnect them in the reverse order of the dates of their existing contracts with the Government.

The proposed agreement further provides that the Government, upon request of the Company, shall operate any of the generating units at no load as condensers to the extent that such operation does not unreasonably interfere with the Government's commitments and operating practices.

The agreement further provides that the Company shall pay the Government for power and energy delivered into the Company's system \$59,000 per month

with one unit in operation and \$52,000 per month with two units in operation, less \$1.55 per kilowatt per month of the maximum demand of the Government for such month and less 4 mills per kilowatt for all the kilowatt hours of energy taken out of the Company's system by the Government in excess of 250 kilowatt hours per kilowatt of maximum demand of the Government for such month. "Maximum demand of the Government" for any month shall mean the total of the 30-minute demands of individual customers during the past 12 months' period adjusted for a power factor below 85 percent. The Company shall pay to the Government, moreover, for the period after all three generating units are available for commercial operation an additional sum of \$6,000 per month. If all three generating units are not available for commercial operation during any month (excluding periods for inspection, maintenance and repairs scheduled in advance by mutual agreement of the parties), the \$6,000 payment shall be ratably reduced.

The agreement further provides that in the event the amounts of the various classifications of energy presently determined by the Government to be available from the Denison Dam Project are changed at any time through the integration of the Denison Dam Project with other hydro-electric projects in the area, change in War Department policy in operation of the Denison reservoir, the construction of additional reserve storage in the Red River Basin above the Denison reservoir, or other factors affecting such amounts, the Government shall, not oftener than one a year excepting on its own volition, make a proper redetermination of such amounts and notify the Company promptly of the results thereof. If, after such redetermination, the Government notifies the Company that the primary energy available from the Denison Dam Project has been increased, the commitment of the parties for delivery and receipt of primary energy shall be increased by an amount equivalent to half this increase. Furthermore, if the Government finds that it has additional primary energy available for sale in Texas from the Denison Dam Project it may, at its election, increase the commitment of the parties for the delivery and receipt of primary energy as it may specify to the Company in writing; *Provided*, That the total of all increases in primary energy shall not exceed 30,000,000 kwh per year without the consent of the Company. In the event the amount of primary energy delivered to the Company is increased, as described above, or 70,000,000 kilowatt hours of primary energy per year are not available from the Denison Dam Project for sale in Texas, the Company's payment to the Government for power and energy shall be adjusted appropriately by 4 mills for each kilowatt hour that the primary energy delivered under this agreement differs from 70,000,000 kilowatt hours.

The agreement further provides that the Company shall take power and energy from the Government at the Company's Payne Substation at such power factor as will best serve the Company's

system; *Provided*, That the Company shall not intentionally impose any power factor on the Government's system which would overload or impair the Government facilities or unreasonably interfere with the Government's commitments. The Government, on the other hand, shall take power and energy from the Company at the power factor which the loads of the Government's customers impose on the Company's system.

The power and energy delivered by the Government into the Company's system shall be delivered as three phase alternating current at 60 cycles at 138-kv to the Company's Payne Substation. The Company shall deliver power and energy to the Government at such points on the Company's system which shall accord with the Company's usual wholesale practice.

The agreement further provides that in the event the Company disposes of any substantial part of its facilities it shall make adequate provision for delivery to the Government and its customers of so much of the power and energy as may be necessary to supply the requirements of the Government and its customers in the area served by these facilities. The Company shall not be obligated to install or construct new transmission or related facilities solely for the purpose of delivering power and energy to the Government or its customers, the cost of which would, in the opinion of the Company, result in an excessive financial burden to the Company and the Company shall not be required to furnish any transmission or related facilities which the Government could not construct or acquire under the authorization of the Flood Control Act of 1944 if funds therefor were provided by the Congress.

The agreement further provides for proper meter readings and adjustments.

The agreement further provides that the power and energy delivered by the Government to the Company's system and the power and energy delivered to the Government for its customers shall be made available continuously except for interruptions due to uncontrollable forces, or for temporary interruptions which in the opinion of the party owning the facilities in which such interruptions occur, may be necessary or desirable for purposes of maintenance, repairs, replacements, installation of equipment, investigations and inspections.

The agreement further provides that the existing contract between the parties dated May 3, 1944, as amended and modified, for the sale of power and energy shall terminate instantaneously with the beginning of service under this agreement.

The agreement further provides that the Company shall terminate any contract it has with any customer entitled to receive service from the Government under this agreement if requested to do so by such customer who has entered into a contract with the Government for the service covered by the Company's contract, but service shall continue under the terms of the Company's contract until service begins under the Government contract.

The agreement further provides that the failure of either party to pay to the

other any amount due under this agreement shall entitle such other party to discontinue the delivery of power or energy upon giving 20 days' prior written notice to the defaulting party, unless such payment is made before the discontinuance of such delivery.

The agreement further provides that the performance of the Government's obligations hereunder is contingent upon the Congress making the necessary appropriations for the expenditures incident to the performance of this agreement.

The agreement further provides that it is the purpose of the parties that their system shall be so operated that power and energy shall not flow from the Company's system to points outside the State of Texas or from points outside the State of Texas into the Company's system.

The agreement further provides that it shall become effective upon the date of its execution, and service shall begin on the first day of the month following the date of the confirmation and approval of rates by the Federal Power Commission and shall remain in force and effect for a period of 20 years unless sooner terminated. Either party may terminate this agreement at any time by giving 6 years' written notice to the other party in advance of the effective date of termination thereof.

The agreement further provides that before the Government shall sell for use in the State of Texas, to any party other than the Company, any of the power and energy generated at the Denison Dam Power Plant, other than that delivered to the Company under this agreement, the Company shall have the opportunity to purchase such power and energy under terms and conditions similar to those provided in this agreement.

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 23d day of May A. D. 1947.

Appalachian Electric Power Company ("Appalachian"), an electric utility subsidiary of American Gas and Electric Company ("American Gas"), a registered holding company, having filed an application-declaration and amendments thereto pursuant to sections 6 (b) and 7 of the Public Utility Holding Company Act of 1935 with respect to the following transactions:

Appalachian has entered into a credit agreement whereby the banks named below will make loans to Appalachian in the amounts shown during the period from the effective date of the agreement to July 1, 1950. Of the aggregate amount of \$12,600,000 which the banks are obligated to lend, \$5,000,000 will be borrowed and notes will be issued therefor within 10 days after the effective date of the agreement in the amounts shown below:

Name of bank	Amount of commitment	Amount of immediate loan
Guaranty Trust Co. of New York	\$2,520,000	\$1,000,000
Irving Trust Co.	2,520,000	1,000,000
Mellon Bank & Trust Co.	1,890,000	750,000
Bankers Trust Co.	1,890,000	750,000
Central Hanover Bank & Trust Co.	1,260,000	500,000
Chemical Bank & Trust Co.	1,260,000	500,000
The Philadelphia National Bank	1,260,000	500,000

The proposed loans will be evidenced by promissory notes maturing December 31, 1950, and are to bear interest from their respective issue dates at the rate of 1½% per annum for a period from the effective date of the agreement to a date two years from such effective

date, and at the rate of 1¾% per annum during the period commencing two years from the effective date to maturity. Appalachian will pay to each bank a commitment fee of ¼ of 1% per annum until June 30, 1950 on the daily average unused amount which such bank is obligated to lend. Loans shall be made simultaneously from the banks on 10 days' notice and may be prepaid on similar notice, such loans and prepayments to be borne or made ratably to all banks. Appalachian may, on 10 days' notice, terminate or reduce pro-rata in the aggregate amount of \$1,000,000 or multiples thereof, the obligations of the banks to make the loans provided for in the agreement.

The application-declaration, as amended, represents that Appalachian will increase its common stock equity by December 31, 1948 by the amount of \$5,000,000 over the amount shown on its books of account as of December 31, 1946, said increase in common stock equity to be achieved by either the sale of additional common stock or the retention of earnings. It is further represented that by December 31, 1950 the ratio of common stock equity to total capitalization will be increased to 25%. In the event that Appalachian's equity is not increased in the manner stated above by December 31, 1948, and/or the ratio of common stock equity to total capitalization will be less than 25% at December 31, 1950, a dividend restriction will become operative whereby not more than 75% of the earnings available to the common stock may be paid out as dividends on common stock when the ratio of common stock equity (including surplus) is between 20% and 25% of total capitalization, and not more than 50% of such earnings may be paid out as dividends when the ratio falls below 20%.

Appalachian states that the proposed loans are necessary to provide funds to enable it to proceed with its construction program, and that any plan for long-term financing will provide for payment of the then outstanding notes issued under the credit agreement.

The proposed transactions have been approved by the State Corporation Commission of the State of Virginia, the State in which Appalachian was organized and is doing business, and by the Railroad and Public Utilities Commission of the State of Tennessee, the State in which Appalachian also does business.

The application-declaration having been filed April 18, 1947, and amendments thereto having been filed on May 2, 1947 and May 7, 1947, and notice of said filing, as amended, having been given in the form and manner prescribed by Rule U-23 promulgated pursuant to said act, and the Commission not having received a request for hearing with respect to said application-declaration, as amended, within the period specified in said notice or otherwise, and not having ordered a hearing thereon; and

The Commission finding with respect to the application-declaration, as amended, that the requirements of the applicable provisions of the act and rules thereunder are satisfied, that no adverse findings are necessary thereunder, and

deeming it appropriate in the public interest and in the interest of investors and consumers that the said application-declaration, as amended, be granted and permitted to become effective, and deeming it appropriate to grant the request of applicant-declarant that the order become effective at the earliest date possible;

It is hereby ordered, Pursuant to said Rule U-23 and the applicable provisions of said act and subject to the terms and conditions prescribed in Rule U-24 that said application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective forthwith.

(5) Whether or not there will have been compliance with Rule U-50 promulgated under the act;

Notice is hereby given that an application-declaration has been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by North Penn Gas Company ("North Penn"), a gas utility company and a registered holding company, and its parent, Pennsylvania Gas & Electric Corporation ("Penn Corp"), also a registered holding company. Applicants-declarants designate sections 9 (a), 10 and 12 (c) of the act and Rule U-42 thereunder as applicable to the proposed transaction.

Notice is further given that any interested person may, not later than June 9, 1947 at 5:30 p. m., e. d. s. t., request the Commission in writing that a hearing be given on such matter, stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law raised by said application-declaration proposed to be controverted, or may request that he be notified if the Commission should order a hearing thereon. At any time thereafter, such application-declaration, as filed or as amended, may be permitted to become effective or may be granted as provided in Rule U-23 of the rules and regulations promulgated pursuant to said act, or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof. Any such request should be addressed: Secretary, Securities and Exchange Commission, 18th and Locust Streets, Philadelphia 3, Pennsylvania.

All interested persons are referred to said application-declaration which is on file in the office of the Commission, for a statement of the transaction therein proposed which is summarized below:

North Penn proposes, subject to the approval of the Commission, to redeem all of its presently outstanding \$7.00 Prior Preferred Stock, consisting of 6,188 shares, at the redemption price of \$107.50 per share and to retire such stock, including 267 shares thereof presently held in North Penn's treasury. North Penn proposes to use treasury cash for this purpose. The application-declaration states that dividends on such preferred stock have been paid regularly since its original issuance.

The applicants-declarants request that the Commission's order be issued herein on or before June 10, 1947, and become effective forthwith in order that notice of redemption may be sent to the

stockholders on or before June 15, 1947, so as to permit the retirement of the \$7.00 Prior Preferred Stock on the next dividend payment date, July 15, 1947.

NORTH AMERICAN LIGHT & POWER CO. ET AL.

MEMORANDUM OPINION AND ORDER WITH RE-
SPECT TO FUNDS OR SECURITIES

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 26th day of May 1947.

In the matter of North American Light & Power Company, Holding Company System and The North American Company, File No. 59-39; North American Light & Power Company, File No. 54-50; The North American Company and its subsidiary companies, File No. 59-10; The North American Company, File No. 54-82; Illinois Power Company, File No. 54-147.

On December 28, 1942, we entered an interim order¹ suspending the payment of interest due January 1, 1943 by North American Light & Power Company (Light & Power), a registered holding company, on \$5,623,500 principal amount of its debentures² owned by its parent, The North American Company (North American), also a registered holding company. Light & Power then deposited in a non-interest bearing special deposit the interest which was due on January 1, 1943. Prior to the next interest date on July 1, 1943, we again considered the question of payment of interest by Light & Power on its debentures. On June 29, 1943, we entered an order:³ (a) Prohibiting Light & Power from paying interest on its debentures to North American until further order of the Commission; and (b) requiring Light & Power to segregate from its other funds a sum equal to the interest so to be withheld subject to further order of the Commission. We also provided that such segregated funds (including those pursuant to our order of December 28, 1942) were permitted to be invested in obligations of the United States Government.

The reasons which caused us to take the foregoing action are set forth in the opinions accompanying each of the aforementioned orders and are still apposite. The question whether it is fair and equitable for North American to receive either principal or interest on debentures of Light & Power which it holds, is one which we have presently under advisement.

Recently, we approved a portion of a plan (designated as Plan I) pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 which provided

¹ 12 S. E. C. 621, Holding Company Act, Release No. 4023.

² These debentures represent all the outstanding funded debt of Light & Power.

³ 13 S. E. C. 518.

for a settlement by North American, Light & Power, and their subsidiary, Illinois Power Company (Illinois Power) of all claims and counterclaims affecting Illinois Power.⁴ Among other provisions, the plan provides that Light & Power will pay Illinois Power in cash a sum aggregating \$11,300,000.⁵

Light & Power now requests that we modify our order of June 29, 1943, to the extent necessary, to permit Light & Power to release its segregated funds representing accrued interest on its debentures so that the funds may be applied toward the payment to be made to Illinois Power as part of the settlement. It appears that the segregated funds presently amount to \$1,391,818 which reflects interest payable to and including January 1, 1947. North American has joined in Light & Power's request, subject to the reservation that the requested release be without prejudice to North American's rights to receive full payment for all accrued interest.

Light & Power states that it will continue in the future to segregate from its funds sums equal to interest payments on its debentures as they become due, but that it will not replace in the future the segregated funds which it now seeks to use except with the express consent of this Commission.

It appears to us that under the circumstances it is appropriate to permit Light & Power to use its segregated funds representing accrued interest on its debentures for the purpose announced. The alternatives would be for Light & Power to borrow money or to sell assets in approximately the amount of the segregated funds; neither of the alternatives could be availed of under the present time schedule for consummation of the plan. If permitted to use the segregated funds, it appears that Light & Power will be able to meet its obligations under the plan without recourse to any borrowing. Security holders of Light & Power other than North American do not appear to be adversely affected and North American has specifically assented.

Insofar as Light & Power will not replace in the future the segregated funds which it now will use, North American exchanges its claim to interest on the debentures for the period covered by the segregated funds from one which is secured to one which is unsecured. In view of the present value of Light & Power's assets, it does not appear that North American will be prejudiced if it is subsequently found to be entitled to interest on the debentures.

It is therefore ordered, That North American Light & Power Company be, and it hereby is permitted to apply toward payment of its obligations to Illinois Power Company pursuant to that

⁴ — S. E. C. — (1947), Holding Company Act Release No. 7238; our findings and opinion were published as Holding Company Act Release No. 7375. Pursuant to request of the parties, we have sought judicial enforcement of the plan. A hearing is presently scheduled for May 28, 1947 in the District Court of the United States for the District of Delaware.

⁵ In our order approving the plan we reserved jurisdiction to determine ultimately the rights of Light & Power and its various security holders, including North American.

portion of the plan approved by order of this Commission dated February 28, 1947, such funds or securities representing accrued interest on its debentures which it has segregated from its other funds in accordance with orders of this Commission dated December 28, 1942, and June 29, 1943.

It is further ordered, That interest due July 1, 1947 and all interest which may thereafter become payable on the outstanding debentures of North American Light & Power Company, shall be and hereby is made subject to the provisions of the order of this Commission dated June 29, 1943.

It is further ordered, That North American Light & Power Company shall not replace the segregated funds or securities which may be used as hereinabove permitted except pursuant to further order of this Commission.

By the Commission.
